

**Blood Diseases,**

When the blood is diseased and the system Anemic or Scrofulous, it carries sickness through the whole body, for the current of human life is in the blood. This proves how necessary it is to have pure rich blood, because an impoverished condition of it brings on Fevers, Malaria, Rheumatism, Bowel Complaints, Lung Scrofula, General Debility, etc.

**Sans Souci Seaside Resort.**

The pleasantest, quietest, shadiest and most perfectly appointed seaside resort on the Islands. It is only four miles from the heart of the city and within easy reach of the trams, which run every twenty minutes or oftener. Elegantly furnished detached cottages or rooms are obtainable on easy terms. The table is superior to that of any of the city hotels and all the modern conveniences are provided.

Picnics and bathing parties can obtain extra accommodations by telephoning in advance.

The bathing facilities of Sans Souci are superior to those of any place on the beach. 89-tf

**DESCRIPTION AND TERMS:**

CREOLE is the gamest, fastest and best bred stallion that has ever been imported into the Hawaiian Islands. He reduced his record of 2:20 to 2:18 in Petaluma, Cal., August 24, 1894, distancing his whole field in the first heat; then again to 2:15 in Stockton, Cal., September 23, 1894, winning the first heat in 2:15, fourth heat in 2:15, and fifth heat in 2:19, proving that he is a remarkably game as well as a speedy race horse. ("Creole by Prompter out of Grace by Buccaneer show that he is capable of getting a mark of 2:10 and is one of the gamest stallions seen this year, and besides being game, is one of the best formed, and remarkably intelligent."—Breeder and Sportsman, Sept. 25, 1894.) He is 15 1/2 hands high and of powerful build throughout. His color is glossy black with one white hind foot. His disposition is all that could be desired, and his action superb. He is a sure foal getter.

**FARMING WITH ELECTRICITY.**

A Plow Propelled by a Motor Successfully Operated.

To Germany belongs the credit of having first demonstrated the practicability and economy of electric plowing. An electric motor is fixed to the plow itself. The shaft of the motor, by means of suitable gearing, drives a shaft fitted with a pinion, over which a chain runs from one end of the field to the other. This chain is held taut at both ends by triple ground anchors.

When the motor is put in operation it hauls the plow across the field. When the end of the field is reached the plow is tilted to the other side and by reversing the motor the shear starts on its return journey. At a recent test at Halle-on-the-Saale, with a two-furrow tilting plow, two furrows were turned, measuring together twenty-four inches in width by ten inches in depth, and traveling at the rate of thirty-five inches per second.

The actual usual effect obtained was equal to eight horse-power. A remarkable feature of this system is that guided by the tightened chain very shallow furrows can be made with great evenness and regularity and the balance plow can thus be used for turning over stubble land and other light work. The first cost of an electric plow is said to be much below that of a steam cultivating plant. — Exchange.
